Good morning,

The Pre-RD group has just departed SIL in the NRC River Runner Vessel for today's fish acoustic activities. The crew plans to head to RM 2 first, making their way up to RM 11.8, ending in SIL. Today's activities will include checking acoustic functionality. The hydrophone will be inserted into the water and communication with the receiver will be established. The health (battery life, tilt, memory) will be confirmed and data will be uploaded to a jump drive and analyzed at a later time. If malfunction of the receiver is identified, the crew will have to come back out to make any corrections another day, as the River Runner vessel is not equipped to retrieve or deploy the receivers.

Thank you,
Jonni
